KEYBOARD

KEYBOARD

- QWERTY
- DEVORK

- QWERTY keyboard is used by us. Generally, 84 – 104 buttons are available in our keyboard. Biggest button of our keyboard is SPACE button & Second Biggest button of our computer is ENTER button.
- FUNCTION keys contain F1 to F12 buttons which is present in first row of keyboard.
- Numeric keys which are from 0 – 9 & present in second row of keyboard.
- ALPHA keys which is A to Z & present in 3rd, 4th & 5th row of keyboard.

The keyboard is very much like a standard typewriter keyboard with a few additional keys. Its presence is noticed by the little cursor blinking on the screen. When a character key is pressed, the character is displayed at the point where the cursor is there.

FUNCTION KEYS
